SECTION 6 PROPOSAL CERTIFICATION 17
SECTION 7 FORM CIQ 18
EXHIBIT A TO AGREEMENT TO PROVIDE SERVICES TO ALAMO COLLEGES DISTRICT 19

MINIMUM QUALIFICATIONS

The respondents to this RFP must have the following minimum qualifications. Failure to meet minimum qualifications may be grounds for rejection. Alamo Colleges District reserves the right to reject Proposals that fail to include this information with the Offerors Proposal submission.

a. Offeror must affirm in writing and include supporting documentation with proposal submission: Offeror has experience developing software / software solutions using Artificial Intelligence.
Yes

b. Offeror must affirm in writing and include supporting documentation with proposal submission: Offeror is able to demonstrate a minimum of 2 years experience developing previous successful projects utilizing Artificial Intelligence.
Yes

c. Offeror must affirm in writing and include supporting documentation with proposal submission: Offeror has a certification in Artificial Intelligence.
Yes

d. Offeror must affirm in writing and include supporting documentation with proposal submission: Offeror will provide a “sandbox”, a controlled test environment of the solution for Alamo Colleges to log into, analyze and assess “hands-on” how the solution operates and what features are available.
Yes

SECTION 1 : SCOPE OF WORK

A. Statement of Work:

1. Offerors must provide comprehensive responses to the following:

   a. Describe an AI solution your firm has developed similar to what is requested in this RFP solicitation.

      Answer:

      We developed our own customized **Optical Character Recognition (OCR)** system that can extract specific data from images and PDFs, then convert it into editable text format. This allows for fast and accurate digitization of documents.
      Additionally, we've built **Agentic workflow systems** that automate tasks and decision-making processes without needing heavy or complex coding. These solutions make operations more efficient and user-friendly, especially for teams with limited technical backgrounds.

   b. Provide the solution name(s) and the institution names you developed similar solutions for.

      Answer:

      We developed and delivered a customized Optical Character Recognition (OCR) solution for Credentia, specifically tailored to meet the unique regulatory and operational requirements of multiple jurisdictions, including: Pennsylvania, District of Columbia, South Carolina, Colorado, Georgia, Maryland, North Carolina, Virginia, California, Nevada, Alaska, Northern Mariana Islands, Guam, and the Virgin Islands.

      This OCR system was engineered to:

      Streamline document processing workflows, reducing manual data entry and improving the accuracy of information capture from various forms and applicant records.

      Support multi-state configurations, allowing each jurisdiction to apply its specific rules, templates, and data extraction formats within a unified system.

      Enhance operational efficiency, enabling faster turnaround times and improved productivity for administrative teams.

      Integrate seamlessly with Credentia's existing infrastructure, including their internal platforms and external regulatory systems, ensuring minimal disruption during deployment and a smooth transition into active use.

      Scale as needed, supporting high-volume processing while maintaining performance and reliability across multiple locations.

      By implementing this customized solution, Credentia was able to significantly reduce

processing times, ensure compliance with state-specific requirements, and improve the overall user experience for both staff and applicants.

c. Describe how your solution will be developed, specifying the overall technology and application architecture. Include details on the following aspects:

1) The core technologies, frameworks, and programming languages that will be used.

Answer:

Core Technologies - Open CV and NLP & LLM

Framework – LangChain, LamaIndex, Hugging Face agents

Programming Language – Python

2) The architecture design (e.g., microservices, monolithic, cloud-based).

Answer:

AI based: Cloud based

Application: microservice

3) Any third-party or off-the-shelf vendor solutions that will be integrated, and their specific roles within the system.

Answer:

No

d. Describe the hosting requirements and security measures for the solution.

Answer:

We offer the option to host it or provide it as a dedicated service on our infrastructure.

Network Security

We ensure that all data in transit is encrypted using TLS 1.2 or higher to protect your information. Access is tightly controlled through strict firewall rules and security groups that only allow essential ports and IP addresses. For administrative access, we offer secure VPN connections or IP whitelisting.

Application Security

Your application is protected with a Web Application Firewall (WAF) to guard against common threats like those in the OWASP Top 10. We conduct regular vulnerability scans and both internal and third-party penetration tests. Our development process follows secure coding practices, including peer code reviews and thorough dependency checks.

Authentication and Access Control

To keep your system safe, we implement role-based access control (RBAC) with the principle of least privilege. All admin and privileged accounts are secured with Multi-Factor Authentication (MFA). User activity is centrally logged and monitored through a Security Information and Event Management (SIEM) system.

Data Protection
All data at rest is encrypted using AES-256, a trusted industry standard. We perform daily backups and regularly test our recovery procedures.

Compliance
Our hosting environments follow best practices aligned with ISO 27001, SOC 2 Type II, and GDPR. We also review all third-party components and cloud services to ensure they meet our strict compliance and security requirements.

e. Describe the deployment steps for the solution, changes should be needed.

Answer:

We follow a structured and collaborative deployment process to ensure smooth execution and alignment with your requirements. The key steps are as follows:

Sprint Planning & Requirements Gathering
We begin with a sprint planning session to identify the required changes and define the scope of customization. During this phase, we collaborate closely with your team to prioritize features and establish clear objectives.

Project Timeline & Documentation
Based on the scope, we provide either a detailed Sprint Plan or a Gantt Chart to outline the timeline, key milestones, and resource allocation. This ensures transparency and helps align expectations on deliverables and deadlines.

Customization & Development
Our development team proceeds with the required customizations following secure development lifecycle practices. As part of our commitment, we offer the first 600 hours of customization at no cost, allowing flexibility and early progress without additional financial impact.

Testing & Quality Assurance
All changes undergo rigorous testing, including unit testing, integration testing, and QA validation. We also coordinate with your team for User Acceptance Testing (UAT), for which a 15-day access window is provided.

Deployment & Go-Live
Once approved, the changes are deployed to the production environment using a controlled and documented process to minimize risk and ensure stability.

Post-Deployment Support
After deployment, we monitor the system, address any issues, and provide support as needed to ensure a smooth transition.

Throughout this process, communication remains a top priority. We maintain regular updates, status reports, and checkpoints to ensure your team is informed and engaged every step of the way.

f. Describe the risks or considerations necessary to manage during deployment.

Answer:

During deployment, several risks and considerations must be proactively managed to ensure a stable and successful rollout. Our approach addresses both technical and operational risks through the following practices:

Real-Time Monitoring & Issue Detection
We leverage our custom-built monitoring system to continuously track the performance of our models and solutions. This system enables us to detect critical issues such as data drift, which occurs when incoming data begins to diverge from the data originally used to train or configure the solution. Catching these shifts early helps us respond quickly and preserve solution accuracy and reliability.

UAT and Feedback Cycle
To mitigate functional or user-experience risks, we provide a 15-day window for User Acceptance Testing (UAT). This allows your team to thoroughly test the solution in a controlled environment, provide feedback, and validate that all requirements have been met before deployment to production.

Change Management & Communication
Any deployment involving customization or updates is carefully planned and documented, with clear communication of timelines, responsibilities, and rollback procedures. We ensure that all stakeholders are informed of potential impacts and changes.

Performance & Compatibility Checks
Prior to deployment, we conduct compatibility and performance testing to identify potential integration issues with existing systems (e.g., Banner, Degree Works, or Acalog). This helps prevent unexpected disruptions during the go-live phase.

Rollback and Contingency Planning
We prepare detailed rollback plans for every deployment to minimize risk in the event of unforeseen issues. This ensures that we can quickly revert to a stable state with minimal downtime.

Post-Deployment Monitoring & Support
After go-live, we continue to monitor system performance and user activity to quickly detect and resolve any anomalies. This post-deployment support period is critical for ensuring long-term system stability.

By actively addressing these considerations, we minimize deployment risk and ensure a smooth transition from development to production.

g. Describe what resources and processes required to maintain the final delivered solution.

Answer:

To maintain the final delivered solution, the following resources and processes are required depending on the hosting approach:

If Hosted by Us (ExamRoom -Managed):

Our team of experts will handle the ongoing maintenance of both the codebase and the infrastructure. This includes:

Security Maintenance:
We apply regular security patches, monitor for vulnerabilities, and implement firewalls and access controls to protect against threats.

Scalability & Performance:
Infrastructure is actively monitored and scaled as needed to accommodate changing user loads, ensuring consistent performance and uptime.

Availability & Uptime:
Our infrastructure is designed for high availability, with real-time monitoring and automatic failover mechanisms where applicable.

Support & Issue Resolution:
We provide ongoing support for troubleshooting, enhancements, and updates via a structured ticketing or helpdesk system.

Monitoring & Alerting:
Custom monitoring tools are in place to track system health, detect anomalies, and alert the support team proactively.

If Hosted by the Client (On-Premises or Self-Managed):

The solution is designed to be flexible and can be hosted in your own environment. To do this, you will need the following:

Technical Resources:
A team of qualified technical personnel (e.g., system administrator, DevOps engineer, or backend developer) capable of deploying and maintaining the solution based on the detailed instructions provided in the README and documentation.

Infrastructure Setup:
You will need appropriate server hardware or virtual infrastructure that meets the system requirements (e.g., OS, RAM, storage, network access). Guidelines for deployment, configuration, and scaling are included in the technical documentation.

Maintenance Processes:

Your team will be responsible for:

Applying software updates and patches as released.

Performing regular data backups and recovery testing.

Managing user access and authentication settings.

Monitoring system logs, performance metrics, and availability.

Security Practices:
You must implement network-level and application-level security best practices, including SSL/TLS encryption, firewall configurations, access restrictions, and incident response procedures.

Vendor Support:
Even with self-hosting, our team is available for guidance, escalated support, and assistance with upgrades or troubleshooting through a defined service arrangement.

In both cases, we ensure clear documentation, onboarding support, and ongoing collaboration to help your team maintain the solution effectively and securely.

h. Describe / outline the following:
   1) Process to request and implement updates.

Answer:

We have implemented a comprehensive feedback mechanism in the UAT (User Acceptance Testing) environment to streamline user input during testing. Users can easily provide feedback by capturing and submitting screenshots or screen recordings directly through the system. Each submission automatically triggers a notification to our team, allowing us to promptly review the feedback. For every valid input received, a corresponding ticket is generated in our tracking system to ensure proper documentation and resolution. Once the issue is addressed or the suggestion is implemented, the ticket is closed, thereby completing the feedback loop efficiently.

   2) Timing required to process solution update requests.

Answer:

When a request is raised, it is first categorized and depending on the classification, a specific time frame is assigned for resolution, which aligns with the priority and complexity of the request. This approach allows us to manage updates efficiently while setting clear expectations regarding delivery timelines.

3) Cost: Detail the pricing structure or any factors that may influence the cost of updates.

Answer:

Our pricing structure for updates and additional work is straightforward and transparent. Any updates outside of the standard support and maintenance scope are billed at a rate of $75 per hour, based on an approved work order request.

Before beginning any work, we provide a detailed estimate outlining the scope, expected hours, and associated costs. No charges are incurred without prior approval from your team. Factors that may influence the total cost include the complexity of the request, required turnaround time, and whether the task involves integration with third-party systems or extensive customization.

We are committed to clear communication and collaborative planning to ensure that all updates are delivered efficiently, within budget, and aligned with your operational needs.

i. Describe the level of involvement required of the Alamo Colleges team during development and implementation of the solution.

Answer:

Once the requirements are finalized and agreed upon by Alamo Colleges team, we proceed with the design phase. A detailed design is prepared and presented through a design demonstration to ensure alignment with the business objectives and user expectations. Upon receiving approval for the design demo, the solution is developed and deployed to the User Acceptance Testing (UAT) environment. During UAT, end users thoroughly test the system to validate that it meets the specified requirements and functions as intended in real-world scenarios. This step is crucial for identifying any final issues or adjustments before the solution is moved to production

j. Alamo uses Modern Campus Catalog (formerly Acalog), Ellucian Banner, and Degree Works. Describe how Offeror's Solution will integrate with these systems to support the desired automation.

Answer:

To support the desired level of automation and interoperability, we offer multiple integration options based on your existing infrastructure and technical preferences:

API-Based Integration: We provide robust RESTful APIs that can interact directly with systems like Banner and Degree Works. This allows for real-time data exchange and supports bi-directional synchronization of key information such as course catalogs, student records, and program requirements.

WebSocket Connections: For scenarios requiring near real-time updates or event-driven communication, our platform supports secure WebSocket integration. This is particularly useful for triggering updates based on system events (e.g., course updates

or student registration changes).

Batch Processing via SFTP: When scheduled or large-volume data exchanges are needed (such as nightly syncs or historical data transfers), we offer secure SFTP-based batch processing. Data can be exchanged in standard formats like CSV, XML, or JSON, and the process can be fully automated.

Cloud-Native Integration: Our solution is built to support cloud technologies such as Azure Logic Apps, AWS Lambda, or Google Cloud Functions to enable event-based workflows and scalable integration pipelines. We can also work with middleware or enterprise service bus (ESB) solutions already in place.

We will work closely with your IT team to define the best approach for each system, ensuring secure, efficient, and reliable integration that supports your long-term automation and data integrity goals.

k. Provide the institution name(s) and contact information of clients Offeror has integrated with their Banner/Degree Works platforms for solutions Offeror has developed similar to the solution requested in this RFP solicitation.

Answer: (@Amanda, Please help on this, I tried reaching Rajkumar, Cheng but they couldn't help, we need the client details, where we have implemented OCR)

Pennsylvania

District of Columbia

South Carolina

Colorado

Georgia

Maryland

North Carolina

Virginia

California

Nevada

Alaska

Northern Mariana Islands

Guam

l. In the event of contract termination or end of life, describe how Offeror will transfer previously acquired data to Alamo Colleges District.

Answer:

In the event of contract termination or end-of-life, we are fully committed to ensuring a smooth and secure transfer of all data previously acquired by the Alamo Colleges District. We offer flexible data export options tailored to your preferred method, including:

API Access – We can provide structured data exports through secure API endpoints, allowing for seamless and automated retrieval.

SFTP Transfer – Data can be delivered via secure file transfer protocol (SFTP), ensuring encrypted, reliable delivery of large datasets.

WebSocket – For real-time or streaming data needs, we support transfer via secure WebSocket connections.

Flat File Delivery – We can also provide data in commonly used file formats (e.g., CSV, JSON, XML) packaged and delivered securely.

All transferred data will be formatted according to agreed specifications and accompanied by relevant documentation to support integration or archival. We will coordinate closely with your technical team to schedule and validate the transfer, ensuring completeness, accuracy, and compliance with your internal data governance policies.

SECTION 2
TERMS AND CONDITIONS OF THE RFP AND SUBMISSION OF PROPOSAL

A. Terms and Conditions of the RFP:

a. In response to this RFP, please provide information regarding the following matters:

1) Purchase Price:
   a) In reference to Section 3 of the RFP, the Offeror must provide a detailed explanation of how the proposed price(s) were derived for the items listed.

2) Quality of Vendor's Goods and Services:
   a) List any awards or recognition your firm has received within the past five years. These may be professional, technical, or charitable in nature.
   b) A brief profile outlining the history, philosophy, and target market of the firm.
   c) List policies and procedures your firm follows to maintain service excellence.
   d) Provide efforts the firm makes to keep its professionals informed of developments relevant to the industry.

3) Extent to Which the Goods or Services Meet the District's Needs:
   a) A brief discussion of your firm's background and experience in providing the requested goods and services for academic institutions.
   b) Describe how your firm will meet each of the requirements outlined in the Statement of Work.

A. Preparation of Proposals:

1. Offerors are expected to examine the complete Request for Request for Proposal documents and all attachments. Failure to do so will be at the Offeror's risk.

2. Each Offeror shall furnish the information required by this Request for Request for Proposal.

B. Submission of Proposal:

1. Offeror may upload proposal to Alamo Colleges District e-Bidding portal; or submit one (1) original bound copy and one (1) electronic copy (preferred format for electronic copy is Word or PDF), of the Proposal by courier or in person, on the forms provided, signed, and sealed no later than to 2:00 P.M. Central Time (CT) on May 27, 2025, clearly identified as follows:

   Alamo Colleges District
   Purchasing and Contract Administration
   Re: Purchase of a Credit Mobility Solution
   RFP # 2025-0075
   Reception Desk
   2222 N. Alamo St.
   San Antonio, TX 78215

SECTION 3
PROPOSAL PRICING SCHEDULE

Proposal Pricing of: _____
Offeror Name

Please provide pricing based on the request below. For evaluation purposes, the proposed price will be used to calculate the total cost for development and implementation services.

This information will be used in evaluating the price of the Offeror's proposal.

Item #	Description	Price
1.	Total Cost of Development and Implementation of the proposed Credit Mobility Solution	$_____

Offeror must provide a breakdown of how pricing is calculated but must also provide the total cost of the solution in the table above.

SECTION 4
OFFEROR'S CHECKLIST

A. Have all specifications and features been met? Yes _____No _____
If no, please explain: _____

B. Has the Offeror provided a list of names, address, contact person, and phone numbers of a minimum of three (3) but not more than five (5) client references (including school districts, higher education institutions, or other political subdivisions) for which equipment and/or services of a comparable nature, scope and complexity have been provided by your firm? Yes ___No ___

C. Has the certificate of non-collusion been signed? Yes _____No _____
If no, please explain: _____

D. Does Offeror owe any State of Texas Margin taxes? Yes _____ No ____
If yes, please explain: _____

E. Is the person submitting this proposal currently more than thirty (30) days delinquent in child support payments? Yes _____ No ____ If yes, please explain: _____

F. Location of Principal Place of Business (City/State): _____

G. If neither bidding company nor the ultimate parent company or majority owner has its principal place of business in Texas, does offeror, ultimate parent company, or majority owner employ at least 500 people in Texas? Yes ____No ___

H. Does the Offeror have any information to disclose about past or current relationships that may impact the Offeror's service? Yes _____No ____

I. Does the Offeror agree to "hold harmless", defend at its own expense and indemnify Alamo Colleges District against any and all liability arising out of acts or failures to act by the firm or its officers, agents or employees? Yes _____No _

J. If not submitted through the eBidding portal, has one (1) unbound original and one (1) electronic version on flash/thumb drive of the proposal been submitted with Offeror's response? Yes _____ No ____

K. Does the Offeror meet all specific requirements imposed by federal, state or local laws or rules and regulations? Yes _____ No ____

L. Offeror agrees to comply with all the stated requirements in this request for proposal. Any exceptions must be stated in the proposal response. Yes _____ No ____
Exceptions: (Use additional pages, if necessary)
_____

M. Has all requested information in the RFP been addressed? Yes _____ No _____

N. Has information been provided to substantiate minimum qualifications? Yes_____ No_____

O. How did Offeror learn about this project? _____

P. Offeror is to state their willingness to allow other governmental entities to participate in this contract, if awarded.
Yes _____ No _____

Q. The undersigned acknowledges receipt of the following Addenda to the Request for Proposal, the provisions and requirements of which have been taken into consideration in the preparation of this response.

Addenda Numbers: No. _____ No. _____ No. _____ No. _____

SECTION 5
CERTIFICATION OF NON-COLLUSION

"The undersigned affirms that they are duly authorized to execute this contract, that this company, corporation, firm, partnership or individual has not prepared this proposal in collusion with any other Offeror, and that the contents of this proposal as to prices, terms or conditions of said proposal have not been communicated by the undersigned nor by any employee or agent to any other person engaged in this type of business prior to the official opening of this proposal."

FILL IN APPLICATION INFORMATION:

A CORPORATION, chartered in the State of _____, authorized to do business in the State of TEXAS.

A Partnership, composed of : _____

An Individual, operating under the name of: _____

Respectfully Submitted,

(SEAL: If Proposal is by a Corporation)

By: _____
Signature

_____
Name (Print or Type)

_____
Position with Company

_____
Offeror Name

_____
Street Address

_____ _____
Date City, State Zip

_____ _____
Phone No. Fax No.

_____
E-mail Address

SECTION 6
PROPOSAL CERTIFICATION

I certify that I, the undersigned, am duly authorized to execute this certification. I have carefully reviewed the RFP documents and any attachments and agree to abide by all terms and conditions contained therein.

Further, I certify that all statements and documents submitted by my firm/company are true and accurate and may be verified by Alamo Colleges District. It is recognized that all parts of the proposal response become the property of Alamo Colleges District and will not be returned.

_____	_____
Signature	Email Address
_____	_____
Printed Name	Telephone Number
_____	_____
Title	Fax Number
_____	
Firm / Offeror Name	

SECTION 7 FORM CIQ

CONFLICT OF INTEREST QUESTIONNAIRE **FORM CIQ**

For vendor doing business with local governmental entity

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.	**OFFICE USE ONLY**
This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.00(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a). By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. *See* Section 176.006(a-1), Local Government Code. A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.	
1 **Name of vendor who has a business relationship with local governmental entity.**	

2 ☐ **Check this box if you are filing an update to a previously filed questionnaire.**
(This law requires that you file an update completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

3 **Name of local government officer about whom the information in this section is being disclosed.**

_____
Name of Officer

This section (item 3 including subparts A, B, C & D) must be completed for each officer with whom the vendor has an employment or other business relationship as defined by Section 176.001(1-a), Local Government Code. Attach additional pages to this Form CIQ as necessary.

A. Is the local government officer named in this section receiving or likely to receive taxable income, other than investment income, from the filer of the questionnaire?

☐ Yes ☐ No

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer named in this section AND the taxable income is not received from the local governmental entity?

☐ Yes ☐ No

C. Is the filer of this questionnaire employed by a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more?

☐ Yes ☐ No

D. Describe each employment or business and family relationship with the local government officer named in this section.

4

_____ _____
Signature of vendor doing business with the governmental entity Date

Adopted 8/7/2015

EXHIBIT A
TO AGREEMENT TO PROVIDE SERVICES TO ALAMO COLLEGES DISTRICT

1. Exact Legal Name of Contractor:
2. Term of Agreement:
3. Project Description:
4. Alamo Colleges District Representative and College/DSO:
5. Maximum Amount Payable to Contractor:
6. Project Interim Payment Milestones:
   (description of milestone) - $
   (description of milestone) - $
   (description of milestone) - $

   Total: $
7. Detailed Contractor Deliverables: Contractor agrees to:
8. Notice Addresses:

   Notices to Alamo Colleges District:

   Attention:
   (College or DSO)

   Email: @alamo.edu

   Attention:
   (College or DSO)

   Email: @alamo.edu
9. Notices to Contractor:

   Tel:
   Email:

10. Contractor shall submit all invoices to Alamo Colleges District at the following address:

    Email:
11. Any location requirements for the Project:
12. Content for Contractor authorized to access, transmit, use, or store data for Alamo Colleges District, if applicable 12.1 Contractor TX-RAMP certification requirement & verification of certification attachment as per 8.5.3.1: yes/no

    12.2 Any information technology security level applicable as per section 8.5.3.2 (Security control requirements are posted at https://www.alamo.edu/link/933c81083ff9406bbce395b87047e0e2.aspx):
13. Other Requests/Requirements/Conditions/Exclusions:
